

THE HE SERIES

DOUBLE WALL STORAGE TANK

The Solar Professional's First Choice in
Energy Solutions Since 1978

Product Overview

The HE Series Double Wall Heat Exchange Tank is specifically engineered for installation with residential indirect solar systems. SunEath's solar products have over four decades of engineering and design experience built into every component. Installers should make sure to check building codes to ensure whether this type of heat exchanger is recommended for your project.

Our HE Series tanks include an isolated tank design for better heat retention and tank lining to protect against corrosion and maximize the life of the product.

KEY FEATURES

- Front-facing Collector Feed and Return Fittings for Convenient Installation
- Double Wall for Leak Protection
- 6-Year Limited Warranty

ABOUT THE SUNEARTH

Double Wall Storage Tanks

SunEarth's HE Series solar storage tanks have a double barrier that protects the portable water from the solar fluid. The double layer works as extra protection for how water reserves and is necessary whenever toxic fluids are used as a heat transfer fluid. Incorporating the double wall heat exchanger can eliminate the chance for cross-contamination. Our HE Series tanks feature corrosion-resistant tank lining, automatic temperature control, and over temperature protection, providing your clients with maximum efficiency and comfort.

Solar water heating should never be a gamble. With SunEarth's solar products, professional contractors rest easy. They know their customers will enjoy trouble-free and persistent energy savings for many years to come.

PRODUCT SPECS

Applications. The HE Series double wall water storage tank is suitable for solar water heating systems.

Models. Our double wall storage tank consists of 2 models available in 80- or 119-gallon sizes.

Materials. Featuring double-wall internal heat exchange coil, high-efficiency stainless steel heating element, and insulated tank.

Why SunEarth?

6-Year Warranty
