

# THE REXRACK MOUNTING SYSTEM

FOR SOLAR COLLECTORS

The Solar Professional's First Choice in  
Energy Solutions Since 1978

## Product Overview

SunEarth's RexRack mounting system for solar collectors sets the structural standard for residential and commercial liquid flat plate collector mounting hardware. RexRack is engineered to meet exacting contractor racking requirements for strength, simplicity, versatility, durability and cost.

Constructed of corrosion resistant 6063-T6 anodized aluminum, RexRack is the right choice for challenging high wind and snow load conditions or everyday new or retrofit construction projects.

## KEY FEATURES

- Suitable for Residential & Commercial Projects
- Built for High-Wind Resistance
- Designed for Collectors Mounted in Portrait Orientation

## ABOUT THE SUNEARTH

# RexRack Mounting System

RexRack provides solar professionals with an incredibly strong, versatile and modular residential and commercial racking solution. RexRack incorporates telescoping rear legs to accommodate uneven roof surfaces and to provide a range of slope adjustment for the array.

RexRack is differentiated from traditional mounting systems by eliminating lateral runners on the roof surface. By relocating the runners to the backside of the collectors, a reinforced lattice is created between the two strut runners and the collectors that are clamped to them. The array itself becomes a single unified rigid body, much like unibody construction in newer automobiles. When the array itself is rigid, the rear legs need only carry the vertical load of the array, eliminating the cross bracing required for lateral loads in conventional racking systems. RexRack is the clear racking choice in areas that are prone to high wind loads.

### PRODUCT SPECS

**Applications.** RexRacks are suitable for solar water heating systems and solar pool heating systems.

**Tilt Angle.** The SunEarth RexRacks allow solar collectors to tilt between 20° and 60° from horizontal.

**Materials.** Constructed of AISI 6063 T6 anodized aluminum with AISI 304 stainless steel fasteners.

## Why SunEarth?

### Listed & Certified

SunEarth has the most certified ICC-SRCC systems.

### American Made

Since 1978, SunEarth has continuously built industry-leading solar hot water collectors, components, and packaged systems.

## SunEarth is Your #1 Choice for Solar Products.

With over 40 years of solar industry experience, SunEarth solar systems assist homeowners in reducing their energy bills.

Our products set the standard for quality and value in the North American market, so you can refer SunEarth products with confidence. Your clients will thank you.

*Contact our team today to get started on your next solar installation.*
